The Paraguay/Paranáo river basin covers almost 2.8 million square kilometers (1,091,000 square miles), which is most of southeastern Brazil and Bolivia. Paraguay and northern Argentina. The Paraná River includes the falls of Iguaçu, a huge San of waterfalls that extend 2.7 kilometers (1.7 miles). Together with the Uruguay River, the Paraná free river empties the river of the river of La Plata between Argentina and Uruguay. Rio de la Plata is the most populous region of both matters. The capitals of Buenos Aires, Argentina and Montevídeid, Uruguay, practically face each other through the Student. The Paraguay/Paranáo river basin provides the planet's biome, or pampas from the southern rich. The pampas soil rich and fan and fan and predictable precipitation patterns. They are the most important grazing and lands cultivated on the continent. Coastal's coastal plane is a low and flat land area next to a sea. The coastal planets of the south of the south are found on the northeastern coast of Brazil, the Ocean Atlantic and on the west coast of Peru and Chile Peacock. The coastal planets of northeastern Brazil are extremely dry. The tall Brazilian lands act like a wedge that drives the sea winds from coastal plains. Western coastal plains are also extremely dry. They are stuck between the cold stream of Peru to the west and the Andes Andes to the East. Peru's current brings cold water to the coast of the Peru and Chile Peacock. This cold surface water results in the inverse timal: cold air to the sea and the highest and hotter air. Tremic inversion produces a thick layer of clouds at low altitudes. These low clouds cover much of the coast of the southern lve of the southern. They do not allow precipitation to form. The Atacama desert is part of the Western coastal plains. Atacama is considered to be the driest record world. The average rainfall is about 1 mm (0.04 inches) per year, some parts of the Atacama have never had rain in recorded history.Very few plants grow in this desert. Even bacteria, insects, and fungi are scarce. Larger animal species are also rare, and include the grey fox, a type of deer called the huemul, and the viscachaçÁÁÁthe largest member of the chinchilla family. Ocean birds, such as pelicans, cormorants, and penguins, are found on the desert coast. While Atacama lacks flora and fauna, it is a rich source of copper and a chief source of revenue for the Chilean economy. Teaching about landforms and bodies of water? Help students to recognize and think critically about landforms, bodies of water, and their characteristics with these activities! Hills, mountains, valleys, canyons, cliffs, plateaus, islands, caves, volcanos, sand dunes, peninsulas, beaches, ponds, lakes, bays, streams, rivers, oceans, waterfalls, and glaciers are included. Ideal for first grade, second grade, and third grade classrooms and homeschool students. Integrates writing across the curricPage 23 This landforms pack will engage your students in learning about 19 different landforms / bodies of water. There are Posters, Word Wall Cards, Printables, Interactive notebook, and a 100% Editable PowerPoint. *Also includes digital access via Google Slides.Landforms included in this unit: Mountain, Hill, Valley, Plain, Island, Sand Dune, Peninsula, Canyon, Delta, Plateau, Mesa, Ocean, Sea, Lake, River, Gulf, Canal, Glacier, and WaterfallAnswer Keys are included.eÁÁÁ PowerPoint RevPage 3Make learning about geography come to life with this landforms unit for young learners! Your students will have the opportunity to explore the major landforms that shape our Earth, in a fun and engaging way using both printable and digital activities. The printable activities include:Recommended book listLandforms posters (landform, beach, canyon, desert, hill, island, lake, mountain, ocean, plain, plateau, valley, volcano, waterfall)Word Wall (beach, canyon, desert, hill, island, lake, mPage 4Landforms Landforms Landforms!Included in this product are 4 different ways to help kids comprehend and visualize different landforms. 20 landforms are included: Mountain, Hill, Pond, River, Cave, Island, Valley, Lake, Canyon, Beach, Waterfall, Glacier, Plain, Volcano, Meander, Floodplain, Delta, Archipelago!This is a great activity to help students visualize the landforms! There are many ways of using this product. eÁÁÁÁ 1st set: (horizontal: 1-3) Give studentsÁÁÁ definitions pages and the picture paPage 5No Prep Landforms Flipbook for Gr.3-6: Color Code Diagram of Earth's Landforms and Water Features.Introduce, review, or assess Earth'sÁÁÁthe landforms and bodies of water with this no prep flipbook! Cover 21 landforms and water features: mountain, volcano, valley, canyon, cliff, hill, cave, plains, plateau, mesa, butte, lake, river, ocean, bay, peninsula, isthmus, island, archipelago, dune, and delta. Perfect for your Science Interactive Notebook too! Just print single-sided, and you'ÁÁÁre ready to go!Page 6This updated resource contains 39 Word Wall Cards on 13 pages.– The words have a corresponding picture and definition on each card.– The original landforms terms included are: archipelago, beach, canyon, cave, cliff, continents, desert, dunes, forest, glacier, grassland, hills, iceberg, island, isthmus, lake, mountain, ocean, peninsula, plain, plateau, pond, rainforest, river, valley, volcano, and waterfall. The new terms added are: bay, butte, canal, delta, gorge, gulf, mesa, oasis, prairie, savPage 7Earth Layers and Rocks Vocabulary Cards, Assessments, Activities and GamesVocabulary Cards eÁÁÁ use as a word wall, matching game, sorting activity, "Quiz, Quiz, Trade" game or flashcards. The cards include 30 vocabulary terms, each with a brief description or definition, a visual representation, or both. Assessments: "Earth's Layers" Quiz and a "Rocks" vocabulary test. Answer keys included. The terms of the Earth's layers include: crust, mantle, outer core, inner core, thermal energy, fossils, faulpage 8 This fun, reviews of bingo games that identify relief forms. There are 30 different game frames provided in color and black and white. The call cards for teachers provide track on each relief form to help students practice identification of relief forms by their attributes. This feature covers the following relief forms: bay, beach, butt, canal, canyon, cave, cliff, delta, hill, island, isthmus, lake , Table, mountain, oasis, ocean, peninsula, plateau, pond, river, sand dune, valley, volcano, waterfall, in thpage 9 ** my best -seller! ** (Updated: June 12, 2016) This package will be great with your studies on relief forms in the classroom. This package includes more than 24 days in ideas to complete an entire unit. Included in this package are 16 different relief forms: archipelago, beach, canyon, cave, glacier, hill, island, lake, mountain, plains, plateau, lake, river, valley, volcano and waterfall. At the beginning of the package, there are 16 color posters, one for each relief form, as well as 16 black and white posters of TPAGE 10 students, will like to learn about the shapes of Earth's land and water with the Seek & Lette Science Doodles. Key terms of relief form include Canyon, Valley, Plateau, Plains, Sand Dunes, Mountain, Island, Hill and Delta. Important water terms include lagoon, lake, ocean, river and waterfall and canal. Great for student involvement and retention. Your students will love to look for science and have a fun coloring sheet when finished! This is an activity without preparation! Perfect to use on interactive NoteBPage 11earth's Landforms: Earth and water features minibook, bingo and writing activity!
